## DG6000 Pre-set Medium Flow Pressure Regulator

The DG6000 Pre-Set Pressure Regulator is ideal for balancing pressures throughout any medium-flow irrigation system. It is also used for controlling the output of sprays and sprinklers on center pivot and lateral move irrigation systems.

The DG6000 is presently available with regulated output pressures of approximately 10, 15, 20, 25 and 35 PSI for flow ranges from .5 GPM to 15 GPM under normal conditions.

At high flow rates, water flows through the DG6000 as smooth as glass; there is minimal turbulence through the regulator. The DG6000 does not chatter.

The DG6000 Pre-Set Pressure Regulator is the perfect tool for pressure control on medium-flow agricultural, nursery, greenhouse, commercial landscaping and homeowner irrigation systems.

### SPECIFICATIONS:

The Hendrickson Bros. DG6000 Pre-Set Pressure Regulator is a two-part, tamper-proof sonic welded body, molded from ABS plastic, with exceptional efficiency in pressure loss characteristics.

Body—Chemical Resistant ABS Plastic

Spring—Stainless Steel

Valve—Delrin

Diaphragm—EPDM Rubber

Inlet—3/4 MPT Standard\*

Outlet—3/4 FPT Standard\*

Overall length—4.0"

Outside Diameter—1.85"

Operating Range—0-100 PSI

\*(See price list for inlet/outlet thread configuration.)
