

HENDRICKSON

PGS Rotor

Features:

- High uniformity
- Low application rate
- No riser vibration
- No downward spray
- Built in check valve to eliminate erosion
- No sprinkler interference in pattern
- Built to last
- Uses: Agriculture (solid set, permanent set, portable)
- Nurseries and Landscape

Specifications:

- 1/2" male npt inlet
- Made of higher performance engineering plastics
- Trajectory angle 25.
- Pressure range: 45 to 80 PSI inlet pressure
- Pressure regulator set to 40 PSI
- Diameter 74 FT

Nozzles:

	45	50	60	70	80
Grey	1.95	2.00	2.05	2.10	2.10
White	2.50	2.60	2.60	2.65	2.70
Black	3.00	3.10	3.10	3.10	3.20

The PGS Rotor is specifically designed for use in agriculture, greenhouse, nursery and landscape. The PGS Rotor is produced using the highest quality materials. Consistency and quality are our number one concern. Quality assurance for overall excellence, performance and durability are ongoing at Hendrickson Bros.

SOV

This handy little attachment will allow you to shut off the water to the sprinkler, allowing you to work on the sprinkler and then restart it when you are ready. A couple of turns unscrewing of the sprinkler will activate the valve. To restart the sprinkler, you just turn the sprinkler to tighten.
